

SCRUM Meeting 16

March 25th

What did you complete since the last meeting?

Bryan Hilldrup : Expanded the recycler views to the other tier 3 classes relevant and reorganized/renamed things for visibility. Tasked team with doing superior comments too.

Paul Guller : Card View adapter research and implementation as a layer on top of the recycler for neatness

Avery Rector : Tied authentication process to Firebase Authentication instead of going to Firestore directly, set that process up

Peter George : Worked further on pushing and pulling data. Successfully changing data. Set up home button that returns correctly in stack order, fixed bugs

What will you accomplish before the next meeting?

Bryan Hilldrup : Working on the adapters with Paul, project documentation

Paul Guller : Write tests, fix comments, and work on Card View and try to get it implemented fully working with adapter

Avery Rector : Set up reset password screen and credentials for group members

Peter George : Research more into the difficulties of getting the data off the database efficiently

Do you have anything that's getting in the way of doing your work?

Bryan Hilldrup : school/work

Paul Guller : school/work

Avery Rector : school/work

Peter George : school/work

What insights have you made?

Bryan Hilldrup : NA

Paul Guller : NA

Avery Rector : SHA encryption trashed, firebase authentication works well with firestore with not much added difficulty

Peter George : Updating data is FAR easier than getting data off the database successfully

Do any changes to the project need to be made as a result of your work?

Bryan Hilldrup : No

Paul Guller : no

Avery Rector : Yes, utilizing Firebase Authentication services

Peter George : Yes. Abandon "Task" utility altogether. It is infinitely crashing the program.
